

Helping our clients achieve tomorrow's projects today

HFS Company provides nationwide medical and facility architectural, engineering, construction management and facility management services. Our team of over 40 AEC professionals are equipped to assist you at every stage of the facility life-cycle, and our approach ensures that your project will be completed on time and on budget to your satisfaction.

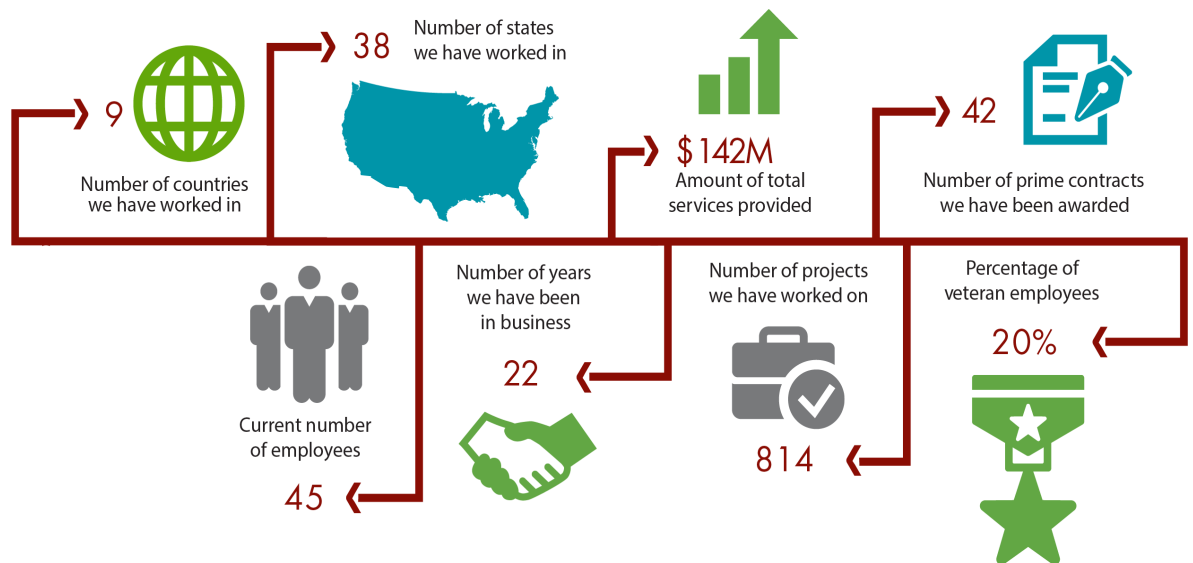

Founded in 2003, HFS provides AEC and specialized consulting on a variety of federal and military medical projects in 33 states and the District of Columbia through 35 prime contracts. HFS has enhanced over 400 facilities across the Federal Government. We have been named one of America's fastest growing companies by Inc. Magazine and are proud to be recognized as one of San Antonio's Best Places to Work.

Whether you need start-to-finish AEC services or specialty consulting, we never lose sight of our duty to provide optimized facility performance. It's why we exist, and it's why clients choose HFS Company time and time again.

"HFS is in the business of providing comprehensive facility solutions."

Architectural and Engineering Design Services

HFS has provided A-E design services to every branch of the military and the Department of Veterans Affairs (VA). We have extensive experience with the planning, analysis, and design phases of a project. We deliver our services on time, within budget, and exceed our client's expectations.

Our professional A-E services include infrastructure studies, facility design, construction support and other engineering services.

Our knowledge of established processes, and design experience allow us to differentiate ourselves from the competition by offering the following:

- Since its founding, HFS almost exclusively performs Federal Government A-E and facility design and support services.
- HFS brings best practices knowledge for the design and construction of federal and VA facilities.
- Our worldwide experience ensures we will be a provider that knows your culture and can meet your expectations.

Construction Management Services

HFS has the qualifications and capabilities to provide the following quality construction management for facilities:

- Construction phase services, Minor and Non-Recurring Maintenance (NRM), Capital Investment Programs, facilities management and operations, and facility planning.
- An inherent understanding of our clients' needs based on our leaders' military background and a long history of Federal and VA projects, enhances our ability to assist with a wide variety of requirements.
- High-quality personnel in a wide variety of disciplines.
- Proven processes in place that address the unique requirements of multiple task orders with aggressive schedules.

Low Voltage Systems Design

HFS provides a variety of design solutions for IT cable infrastructure and low voltage systems. Our Registered Communications Distribution Designer (RCDD) subject matter experts provide and/or oversee the following IT cable and low voltage systems designs:

- Access control systems.
- Inside plant structured cabling, including copper and fiber optic cable systems for data, voice, and video network systems.
- Intercom & door control systems.
- Intrusion detection and alarm systems.
- Nurse call systems.
- Outside plant, including underground and aerial systems.
- Overhead paging systems and patient wandering systems.
- Video surveillance systems, distribution systems, and Wireless network systems.
